

## LV/E1000

- Reel Lifter Truck with Powered Traction and Tilting Lift Cradle
- Capacity 1000kg
- Lift Height up to 2900mm
- Fully Powered

## LV/E1000

The Weston® range of LV reel trucks are available as standard from 500Kg up to 2000Kg capacity.

The Weston®LV/E1000 is a fully powered Reel Handling truck that was developed by renowned inventor, Stephen Weston, for handling reels of varying diameters. The LV/E1000 can handle reels up to a weight of 1000kg. A Weston LV Reel truck even featured on a Discovery Channel report, when its "Daily Planet" science and technology programme made a film about Stephen's inventions!

This new range of trucks is called the Weston®'LV' because the reel is held in a cradle that forms a V shape to hold the reel secure, but is tilted to form an L shape when loading / unloading.

The Weston®LV rectifies a common problem found with many reel trolleys when transporting small diameter reels.

Most reel handling trolleys are designed with a fixed, profiled reel cradle or a pivoting lip at the front that holds large diameter reels when raised.

The Weston®LV uses a V shaped cradle to hold the reel securely, no matter what the diameter of the reel. A hydraulic actuator tilts the reel cradle forward to allow loading and off-loading to pallet level.

### Specification Model: Weston LVretta LV/E1000

|  |  |
|--|--|
| Overall Length                           | 1760mm                                     |
| Overall Height (customisable)            | 1190mm - 2100mm                            |
| Overall Width                            | 800mm                                      |
| Lift Height (Nominal; to base of cradle) | 800mm - 2900mm                             |
| Lowered Height                           | 20mm - 140mm                               |
| Capacity                                 | 1000Kg                                     |
| Maximum Reel Diameter                    | 1200mm                                     |
| Battery                                  | 2 x 12V 100Ah                              |
| Battery Charger (Built in)               | Automatic Variable Input. Output 50Hz, 15A |
