

## CRT/H500

- Reel Lifter Truck with Electric Powered Drive and Hydraulic Powered Lift and Turning
- Capacity to 500kg
- Lift Height to 1440mm
- Fully Powered

## CRT/H500

The \*RaSHCo®CRT/H500 is suitable for handling reels up to a maximum of 500kg and is fitted to a fully powered pedestrian stacker truck. The Reel Turner rotates the reel around its centre of gravity, keeping the load close, making it suitable for mounting on a pedestrian stacker. In operation, the core chuck is inserted into the reel core with the manual release disengaged. As the chuck enters the core, the gripping lugs of the chuck bite automatically into the core. The heavier the load, the harder the bite! The same mechanism is used for reels from 10kg to several tonnes.

Specification	Model: Weston CRT/H500
Overall Length	1760mm
Overall Height	1990mm
Overall Width	800mm
Lift Height (Chuck Vertical)	1440mm (clearance)
Lift Height (Chuck Horizontal)	1300mm (clearance)
Capacity	500kg
Maximum Reel Diameter	1000mm
Battery	2 x 12V 100Ah
Battery Charger	220V Input, 24V Output 50Hz, 15A

The remote release of the reel is carried out via a hand lever and cable Mechanism. This ensures the release operation is 'fail safe' as the operator has to first take the handle out of its holder so it requires a positive decision from the operator to release the reel. Further, to release the reel, it either needs to be down, with the weight of the reel off the chuck, or the operator has to exert more force than the weight of the reel to release it. Rotation is powered by a powerful hydraulic rotary actuator. The CRT/H500 is connected to the hydraulic pump of the stacker truck it is mounted onto, via two 'quick-fit' push connectors.
