- Lifts capacities from 500kg to 2000kg!

Weston Handling Consultancy

GPL/E1000

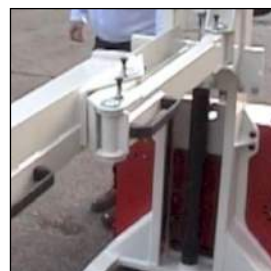

The *Weston*® GPL range is suitable for handling loads up to a maximum of 2000kg and can be fitted with a variety of attachments to meet your handling needs.

The GPL/E1000 with swing-jib (pictured) was designed to be able to work in confined work areas and folds slimly in line with the truck for transporting loads across distances. The attachment folds to extend out thus enabling the load to be swung across from where the truck stands without strain for the operator.

Specification	Model: Weston GPL/E1000
