

Tilt-Table

The **Weston® Reel Tilt-Table** has been developed to transfer rolls and reels from horizontal to vertical in a quick, safe and efficient way.

The reel sits in a cradle modified with a special foot-plate to enable easier loading, unloading and changing of reel shafts. The opening in the centre of the foot-plate has been designed to take standard machine shafts up to 160mm.

The pneumatic table is designed to be bolted to the ground by means of anchor bolts suitable for the surface. It comes pre-set with a fully safety-tested tilt angle but can be adjusted to stop at shallower angles if required.

NOTE: The above specifications are for standard reels of diameter 500mm and a load capacity of 110kg. WHC can modify the cradle of the Tilt-Table to meet customer needs. Call us to find out how our Tilt-Table can help you handle your reels safely and efficiently!

Specification	Model: Weston Reel Tilt-Table
Reel Length Maximum	900mm
Lowered Height	20mm - 140mm
Capacity	110Kg
Maximum Reel Diameter	500mm
Tilt angle	adjustable
