

## CRT/H400

- Reel Lifter Truck with Manual Drive and Hydraulic Powered Lift and Turning
- Capacity to 400kg
- Lift Heights 1.6 to 3.5 Metres

## CRT/H400

The \*RaSHCo® CRT/H400 is suitable for handling reels up to a maximum of 400kg and is fitted to a manual traction-hydraulic powered lift pedestrian stacker truck. Hydraulic levers control lift & lower, for accurate positioning.

The Reel Turner rotates the reel around its centre of gravity, keeping the load close, making it suitable for mounting on a compact pedestrian stacker.

In operation, the core chuck is inserted into the reel core with the manual release disengaged. As the chuck enters the core, the gripping lugs of the chuck bite automatically into the core. The heavier the load, the harder the bite! The same mechanism is used for reels from 10kg to several tonnes.

The remote release of the reel via a hand lever and cable mechanism, ensures the release operation is 'fail safe'. To release the reel, it either needs to be down, with the weight of the reel off the chuck, or the operator has to exert more forces than the weight of the reel to release it - an important feature to maintain good Health & Safety.

Finally, a powerful hydraulic rotary actuator powers rotation of the reel and is controlled proportionally by sensitive levers. The CRT/H400 is connected to the hydraulic pump of the stacker truck it is mounted onto, via two 'quick-fit' connectors.

### Specification

Model: Weston CRT/H400

12V 155Ah

220V Input, (110V optional),  
12V Output 50Hz. 15A
